

BIOLAB

LABORATORY
OF RESEARCH
&
QUALITY CONTROL

Anyone who produces and supplies foodstuffs must guarantee their quality and safety.

The ever-increasing guidelines and quality standards, as well as the conscious awareness of consumers for quality and non-burdened products, require a strong and reliable partner in the field of analysis and quality control.

BIOLAB since 2001 embodies it for its customers. We place utmost importance on services that take into account the needs of our customers, such as microbiological and chemical control of incoming goods or raw materials and products in food businesses, health control of products in the wholesale and retail trade of food through standardized processes or designs up to the introduction and training of quality management systems.

For all these services BIOLAB with three laboratories (in cities Arta, Ioannina, Patra) and specialized staff is the right choice.

BIOLAB Labs were founded in 2001 in Arta,

with the aim of providing research and consulting services and to meet market needs in the sensitive field of testing and quality control in food and water businesses and farmers, across the whole range of agriculture and serving the implementation of ISO 9001, HACCP, ISO 22000, GLOBALGAP, BRC, IFS, ISO 14001, GRASP, KOSHER, HALAL quality systems, as well as in the field of cosmetics, detergents and common household products.

Our laboratories provide services based on the standard EL0T EN ISO / IEC 17025 Quality Assurance System, with total confidentiality, responsibility, respect and reliability. They are recognized by the Greek Ministry of Rural Development, ELGO DIMITRA and EOF (National Organisation for Medicines). BIOLAB Labs are part of the official IDF MILK list, of the official list of recognized laboratories in Japan and Russia, of the official Fruitmonitoring List and are certified by the HALAL Organization.
